SUBJECT INDEX TO VOLUME 7

Aggregation and deaggregation of particles in high-concentrated disperse systems, 253
Analysis of the propellant nitroguanidine using a Leeds & Northrup microtrac, 35
Approaches to paramagnetic separations in biology and medicine, 97

Calibration of spherical particles by light scattering using photon correlation spectroscopy, 223
Capture and recycling of bypassing bubble gas in a fluidized bed: the "bubble eater", 381
Computer simulation of particles separation process on shaking table, 61
Critical analysis of conductometric phase transition porosimetry: I. Capillary freezing and melting, 229
Critical analysis of conductometric phase transition porosimetry: II. Pore geometry factors, 241

Effect of clay content on surface characteristics of coal ground under different conditions, 111
Effect of particle shape on fluid-particle interactions, 399
Effects of liquid viscosity on rheology of concentrated suspensions, 87
Evaluating pore sizes of biological membranes with fluorescent microspheres, 217
Experimental and numerical investigations of solids mixing in a gas fluidized bed, 335

Improved array method for size calibration of monodisperse spherical particles by optical microscope, 209
In-line measurement of the refining effect—an important new tool for use in the pulp and paper industry, 173

Mineral characterization of selected soil samples using a dry dispersion technique, 357
Morphological textural features, 315

Particle counting oil and water emulsions, 23
Particle dispersion by large scale vortex structures, 201
Particle dispersion in anisotropic homogeneous turbulence, 129
Prediction of micropore growth during gasification reactions, 153
Prediction of pressure drop in pneumatic transport systems at various pipe orientations using an empirical correlation for the particle velocity, 71

Quantitative capacitive measurements of voidage in gas-solid flows, 51

Simulation of flux decline due to particulate fouling in ultrafiltration, 187
Structural and mechanical properties of high-disperse powders under dynamic conditions, 283
Suspension effect in potentiometry, 139

Theoetical study of a new material for filters: aerogels, 371
Theory for pure-traveling-wave boundary-guided transport of tribo-electrified particles, 1
